DETAILED ACTION

Response to Arguments

 Applicant's arguments/amendment with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

With respect to the rejection of the last office action mailed on 07/29/08,

Applicant amends the claims and further argues that the prior art of record does not teach the amended claims limitations (see page 7+ of Applicant's Remarks).

In response, Examiner disagrees. Examiner notes Applicant's arguments, however, Ellis further discloses that RAD-24, may be any suitable personal computer (PC), portable computer, notebook computer, palmtop computer,....(personal digital assistant (PDA), etc. ([0092]) and includes a cellular communication interface. Hence the amended claims do not overcome the prior art of record. The amendment to the claims necessitated the new ground(s) of rejection discussed below. This office action is made final.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35
 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

 Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Ellis et al (2005/0028208).

As to claim 1, Ellis discloses an information processing system, comprising: a recording apparatus; a personal computer configured to access the recording apparatus;

A personal computer (Server 80, figs.1-4 and 31+) configured to access the recording apparatus (figs.3 and 4, [0087-0088] and [0195-0196]);

an information processing apparatus (Remote Access Device 'RAD' 24, [0092-0094]) comprising: control means including, user controlled mobile telephone or personal digital assistant for acquiring, without accessing the personal computer or the recording apparatus, control information for controlling preset recording of a program by accessing a remote program information providing server through the internet based on a user request to access the remote program information providing server, (figs.1-3, [0018-0019], [0025-0026] and [0071-0077], [0087-0088] and [0099-0100])

Conversion means for converting contents described in said control information acquired by the mobile telephone or personal digital assistant into code information for setting said program preset recording to the recording apparatus, which is remote from the control means ([0018-0019], [0071-0077], [0087-0088] and [0099-0100]); and

Transmission means for receiving said code information from said conversion means and for transmitting said code information obtained by said conversion means to

Art Unit: 2424

said recording apparatus under control of said control means; the recording apparatus receiving said code information from said transmission means, confirming whether said code information properly sets said program preset recording, and displaying whether said program preset recording is proper or improper ([0018-0019], [0071-0077], [0087-0088] and [0099-0100]).

As to claim 2, Ellis further discloses where the code information acquired by the acquisition means is G-code, information ([0067], [0120], [0130], [0158 and [0165]).

As to claim 3, Ellis further discloses where the transmission means transmits the code information to the recording apparatus by use of an infrared signal ([0018-0019], [0071-0077], [0087-0088] and [0099-0100]).

As to claim 4, Ellis further discloses where control information includes broadcast channel information, broadcast date, broadcast start time, and recording end time of said program ([0018-0019], [0071-0077], [0087-0088] and [0099-0100]).

As to claim 5, the claimed "An information processing method for use in a system including a personal..." is composed of the same structural elements that were discussed with respect to the rejection of claim 1.

As to claim 6, the claimed "A program storage medium storing a computerreadable program..." is composed of the same structural elements that were discussed with respect to the rejection of claim 1.

As to claim 7, the claimed "An information processing system, comprising..." is composed of the same structural elements that were discussed with respect to the rejection of claim 1.

Application/Control Number: 10/016,765

Art Unit: 2424

Claim 8 is met as previously discussed with respect to claim 2.

Claim 9 is met as previously discussed with respect to claim 3.

Claim 10 is met as previously discussed with respect to claim .4

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
